

ANDREA CHIRICOZZI

Andrea Chiricozzi is appointed as researcher at the Department of Translation and Clinical Medicine, Dermatology Unit, University of Pisa.

He attended medical school at the University Campus Bio-Medico in Rome, Italy, graduating in 2007. In 2012, he completed his residency as dermatologist at the University of Rome Tor Vergata, where he continued to work in the Department of Dermatology, headed by Prof. Sergio Chimenti, till 2015.

His scientific activity was further developed at the Laboratory for Investigative Dermatology, headed by Prof. James G. Krueger at the Rockefeller University in New York, USA, where he attended as post-doctoral fellow from 2008 and 2012, and as visiting dermatology by 2012 continuing his fruitful scientific collaboration.

His research interests include skin immunology and inflammatory skin disorders, namely psoriasis and atopic dermatitis. He has been investigator for multiple clinical trials testing biologic therapeutics or new oral drugs for either inflammatory skin disorders or non-melanoma skin cancers.

He is author of more than 60 publications and he was honored with the prestigious Leo-Pharma Research Silver Award in 2012.
